### Acknowledgements

We are very thankful to Ms. Debra Stevenson, Dr. Qamile Ramadani and Dr. Merita Shehu and all the AQH staff for providing overall support to the study. We warmly thank our local study coordinator Dr. Pranvera Krasniqi and Dr. Myvedete Tershnjaku from the National Institute of Public Health Kosovo for their commitment and support in the implementation and quality assurance of the study. We would also like to thank Ms. Fetije Huruglica, Ms. Fekrije Hasani and Mr. Srdjan Simonović who supported in collecting the data relevant for the sampling of the study. Further, we are grateful to Applicable Research Solutions and its staff for ensuring a smooth implementation of data collection and field supervision. Specifically we would like to highlight the excellent work from our data collectors. Lastly we would like to express our gratitude to all participants in our survey including facility managers, doctors and patients.

## **1 Background & Objectives**

The Accessible Quality Healthcare (AQH) project in Kosovo is funded by the Swiss Agency for Development and Cooperation (SDC) and implemented by a Consortium comprising Swiss Tropical and Public Health Institute (Swiss TPH) and Save the Children. The overall goal of the AQH project is to ensure that the health of the population of Kosovo has improved, with strengthened healthcare providers and managers able to meet the needs of the patients (especially vulnerable groups), who are more aware of their rights and needs.

At the request of the Ministry of Health, the AQH project conducted the first national **facility-based Quality of Care (QoC) study** from August to October 2018.

The objective of the study was to measure the quality of care related to structural and procedural aspects, as well as selected outcomes, in Primary Health Care (PHC) in all 38 municipalities in Kosovo.

The specific objectives of this study were to provide PHC service providers with information to:

- Assess the quality of health services provided in several PHC centres in each municipality, including specific structural and procedural aspects.
- Allow comparison of different aspects of quality of care between all municipalities.
- Determine to what degree health providers have infrastructure and consumables available as outlined in the national PHC norms or, where these are unavailable, those outlined in WHO standards.
- Assess patient satisfaction with the services provided at PHC centres.

For this study we considered an operational definition of the quality of health services based on the concept of quality of care presented by Donabedian (1988, 1990), which has frequently been used in similar studies (Boller and Wyss et al., 2003; Matthys, 2013; Kiefer and Kadesha, 2015; Lechthaler, 2015; AQH, 2016). This is characterized by three dimensions:

1) <u>Structural attributes</u> - relate to the setting where health care is provided. These attributes mostly refer to the organizational structure, human and financial resources, as well as availability of technical resources such as clinical protocols and guidelines.

<u>2) Process attributes</u> - relate to the provider-client interaction, for example professional conduct and technical competence, as well as interpersonal relations/client satisfaction.

<u>3) Outcome attributes</u> - relate to the effect of care delivery on the health status of populations. Outcomes result from the structural and process attributes, for example, survival and recovery of patients or, more indirectly, patient satisfaction.

This operational definition is based on the assumption that the three dimensions are connected to each other and ultimately to service quality: good structure increases the likelihood of good processes and good process increases the likelihood of good outcomes, although outcomes are a consequence rather than a component of the quality of services.

## 2 Methodology

### 2.1 Study design

The QoC study is designed as a facility-based cross sectional survey to measure aspects of the quality of care of PHC service. It captures the overall quality of the facility infrastructure (structural aspects), the quality of provider-patient interactions (process aspects) and patient satisfaction after consultation (outcome). The study assesses quality of care provided to all patient groups but particularly focuses on patients with diabetes and hypertension.

The modules for the QoC survey are based on a mix of indicators from the WHO Service Availability and Readiness Assessment (SARA) and the "Tool to Improve Quality of Health Care" within the "ACCESS" program supported by the Novartis Foundation for Sustainable Development (2014), as relevant. The modules were adapted to the Kosovo local context thereby taking into consideration the national PHC norms or, where these are unavailable, the WHO norms established in the Package of Essential Non Communicable Diseases (NCDs) Interventions.

### 2.2 Study area & target population

The survey was implemented in all municipalities. The QoC survey targets PHC facilities in both rural and urban areas. During the survey data was collected at three different levels: 1) the health facility, 2) the health provider and 3) the patients.

### Inclusion criteria for the baseline assessment

Inclusion criteria for the <u>health facilities</u> were as follows:

- Main Family Medicine Centre (MFMC) or Family Medicine Centre (FMC)
- At least one medical doctor assigned to the facility for at least one day per week

Inclusion criteria for <u>health providers</u> of the selected facilities for provider-patient observations were:

- Doctors providing PHC services
- Patients (18 years or older, or children accompanied by a legal representative) accessing the facility and receiving a consultation from a health provider
- Oral informed consent provided by the provider
- Oral informed consent provided by the patient or his/her legal representative (mother/father/caretaker)

Inclusion criteria for patients accessing the selected facilities and receiving consultation were:

- Patients (18 years or older, or children accompanied by a legal representative) accessing the facility and receiving a consultation from a health provider
- Oral informed consent provided by the patient or his/her legal representative (mother/father/caretaker)
- Accessing the facility to receive services either for themselves or their accompanying minors.

### 2.3 Sample size and sampling strategy

### Sampling of health facilities

We applied a random proportional-to-size sampling procedure for each of the domains assuming that the facilities will be allocated to urban and rural areas proportional to the size of

urban and rural populations in the region. The number of daily visits in June 2018 is considered a proxy of daily attendances.

#### Sampling of providers for provider-client observations

<u>All</u> provider-patient consultations, for which informed consent could be obtained from the patient or their legal representative, were observed in each health facility "Provider" hereby only refers to medical doctors (see inclusion criteria). A healthcare provider could but did not have to be observed repeatedly.

#### Sampling of patients for exit interviews

For the exit interviews, <u>all</u> patients that received care for themselves, or for a child in their care, at the facility were interviewed for the exit interview, provided they gave consent<sup>1</sup>. The patients included for exit interviews did not necessarily need to be the same as for the provider-patient observation (see inclusion criteria).

### 2.4 Data collection and analysis

#### Data collection

Before data collection, relevant authorities, specifically Directors for Health and Social Welfare (DHSW), mayors as well as managers of all selected facilities in all surveyed Municipalities were informed about the study, its purpose and its schedule at a meeting hosted by the Ministry of Health on 5<sup>th</sup> July 2018.

The data collection team consisted of 23 data collectors, divided into 10 sub-teams. Most data collectors had a background in medical training and public health and previous survey experience. Each data collection team was assigned to a set of designated facilities where they conducted the assessments. The data collection teams were closely monitored by the local study coordinator and supervisors. Data collection in the field took place from 10 September 2018 until 05 October 2018.

The following procedures were followed at each facility:

- 1) Introduction of purpose and procedures of the survey to the targeted service providers.
- 2) Data collection
  - Starting with provider-patient observations and exit interviews with patients conducted at the facility.
  - Exit interviews with clients were conducted in an appropriate location ensuring privacy and confidentiality.
  - Structural attributes related to infrastructure and management were assessed after the consultation hours in the afternoon.

Data collection was performed electronically using the Open Data Kit (ODK)<sup>2</sup> software on tablets. During and after each day of data collection, the local study coordinator and the supervisors conducted quality assurance.

#### Data analysis

During the analysis of the obtained data, full confidentiality of respondents was assured. Data was analysed using Stata Statistical Software/SE v15.0.

Additive index: The overall scores were calculated as additive indices to indicate the achieved percentage score. For a certain set of questions, e.g. infection prevention and control measures the additive index counts the answers/criteria which were fulfilled or not fulfilled. Questions/criteria which are not applicable were not considered. The number of positive

<sup>&</sup>lt;sup>1</sup> Depending on the capacity of the data collectors.

<sup>&</sup>lt;sup>2</sup> Open Data Kit (ODK) is a free and open-source set of tools for mobile data collection solutions. https://opendatakit.org/

answers is then divided by the total of valid answers (ratio). This way a percentage score is obtained for **each patient**.

Example: For infection prevention and control measures we measured five different aspects. For the first patient none of the aspects we measured was relevant, e.g. no examinations were done.

For the second patient only two of the five aspects were relevant: hand washing before and after the examination. Both actions were not observed. Hence this person had two valid answers but did not achieve any score. So the percentage score achieved for this person was 0.

For the third patient all five actions related to infection prevention and control measures were relevant. However, none of the five actions were observed. So the percentage score is yet once more 0.

The fourth patient was examined and instruments were used. Thus three aspects were relevant, but only one aspect (disinfection of instruments) observed. Hence 1 out of 3 were achieved, translating to a percentage score of 33%.

For the fifth patient all five aspects were considered relevant and all were also adhered to by the doctor. Hence for this person a percentage score of 100% was achieved.

The average index **for the facility** for infection and prevention measures would be calculated as 133/4=33%

Patient	Washed hands before	Washed hands after	Disinfected instruments	used gloves as required	used mask as required	Number of valid answers	Number of positive answers	Ratio (positive/valid answers)
1	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a
2	no	no	n/a	n/a	n/a	2	0	0
3	no	no	no	no	no	5	0	0
4	no	no	yes	n/a	n/a	3	1	33
5	yes	yes	yes	yes	yes	5	5	100
	<u>.</u>	<u>.</u>		<u>.</u>		Facil	ity Score	133/4=33

Yes/no: as observed; n/a: action was not needed, e.g. no examination conducted

**95% - CI**: A 95% confidence interval (CI) is used to analyse the data presented in Tables 15 - 20 whereby the average is a range with an upper and lower number calculated from a sample. Because the true population average is unknown, this range describes possible values that the mean could be. If multiple samples were drawn from the same population and a 95% CI calculated for each sample, we would expect the population mean to be found within 95% of these CIs. CIs are sensitive to variability in the population (spread of values) and sample size. We could say: we are confident that the real value lies somewhere within this value range. A confidence interval cannot be estimated if there is only one observation or if there is no variation of values.

#### n: number of observations in the sample

**Rank**: The rank provides an indication on the position of the municipality related to certain aspects. In other words: how does the municipality perform in comparison to the other 37 municipalities. In case of ties (=municipalities achieving the same score) the average rank is calculated and assigned, e.g. achievement scores are for two facilities 90, then their potential ranks 8 and 9 and are taken together and divided by 2. This results in the rank 8.5. Hence there is no rank 8 or 9 assigned and the next municipality would be assigned the rank 10.

### 2.5 Limitations

### Sample size

The study was designed as a nationwide survey. Hence, in comparison to a census, only randomly selected facilities were included in the study. Due to the different sizes of the municipalities, but also the different utilization patterns in the different municipalities, some municipalities had more facilities included than others. Some of the municipalities had only the MFMC and 1 FMC included. This limits our ability to show possible wider variations in these municipalities.

In addition some facilities had only a few visits from patients on the day(s) of the survey. Thus the numbers of observations or exit interviews varies substantially between the facilities.

#### Interviewer bias

Interviewers were trained and received clear instructions on the data collection, nevertheless variations between interviewers cannot be completely ruled-out.

#### **Clinical observations**

The observations protocols for diabetic and hypertensive patients were very detailed in comparison to other illnesses. Hence, this might partially explain achievement differences between those illnesses and all other.

### 2.6 Ethical considerations

Before the interviews and observations, participants were given an information leaflet and asked for their consent. For this, participants were informed that a) their participation is voluntary, b) they can withdraw from participation at any time without any consequences, c) non-participation will not have any negative effects. Participants were also informed how the data will be used and that confidentiality is ensured as no names or other identifying aspects will be collected.

Ethical clearance was obtained from the Kosovo Medical Chamber on 3<sup>rd</sup> of August, 2018 (Reference Number: 04/2018).

## 3 Results

### 3.1 Summary of results for municipality Leposavić

### 3.1.1 Infrastructure

- One facility was included in the study PHC Leposavić.
- The facilityoffers all services and scored well for infrastructure, cleanliness and hygiene.
- Public accountability items and guidelines were largely present in the facility.
- Most general medical equipment and gynaecological equipment was available; however, functional advanced equipment was limited as was equipment to assess and monitor child growth.
- Only limited medications were available.

### 3.1.2 Clinical observation

- A total of 69 clinical observations were conducted.
- The majority of patients presented for medical issues other than diabetes or hypertension, including referral.
- Four patients consulted for hypertension.
- The facility achieved a score of 86% in terms of adherence to principles of history and physical examination.
- The infection prevention and control scores indicate that in cases where infection prevention and control measures were needed, they were often not performed by the medical doctor.
- The facility received an overall score of 30% for the treatment of patients with hypertension with higher achievements in the subgroup "questioning the patient" but there is also potential to improve especially on the examination of the patient.
- The treatment of patients with other illnesses achieved an average score of 48%. They scored high in questioning the patient (82%) but lower in conducting the examination (30%) and giving advice to the patient (26%).

### 3.1.3 Exit Interviews

- A total of 53 patients were interviewed, including 26 women.
- The majority of the patients had not visited the health care facility in the last three months.
- The majority of the patients were either satisfied or very satisfied with their consultation.
- The satisfaction with the different aspects of the health service was quite variable. The aspects with the greatest potential for improvement were questioning about the current intake of prescriptions and explanation of how to take the prescribed medicine.

### 3.2 Detailed information on results

### 3.2.1 Overall assessment of municipalities

Clinical score (process quality)	61%
Exit score (outcome quality)	75%

### 3.2.3 Infrastructure

Table 4 Services offered

	PHC - Leposavić
Family planning	yes
Antenatal care	yes
Obstetric and newborn care	yes
Immunization	yes
Child care	yes
Adolescent health	yes
STI services	yes
Tuberculosis services	yes
NCD services	yes
Surgery	yes
Outreach activities (mother, newborn and child health)	yes
Lab services	yes
X-ray	yes
Physician present.	5 or more days per week

#### Table 5 Facility infrastructure and overall cleanliness and maintenance

Facility	PHC - Leposavić
The facility and immediate surroundings (facility yard, waiting area outside) are free from long grass, paper debris and solid waste.	yes
The facility has a rubbish bin which is properly used and not overflowing.	yes
There is a designated waiting room for patients.	yes
The current waiting area is mopped, free of dust, trash; dirt, spider webs, and generally tidy.	yes
There is at least one designated consulting room for women.	yes
There is at least one designated consulting room for children.	yes
All examination room(s) ensure(s) privacy/confidentiality (door, window blind, curtain).	yes
All examination rooms are mopped, free of dust, trash; dirt, spider webs, and the rooms are generally tidy.	yes
All examination rooms are well illuminated.	yes
The facility has electricity	yes
During the past 7 working days, did you have any power cuts of more than 1 hour during opening hours.	no
Is there routinely a time of year when this facility has a severe shortage or lack of power?	yes
If yes, specify:	Zimski period
The facility has a functional generator	yes
If the health facility has a functional generator: is fuel available today for the generator?	yes
The facility has a functional heating system.	yes
If yes, specify:	Parno grejanje
Has the facility a functional communication equipment (functional landline telephone or cell phone) available (either private phone or facility phone)?	yes
What type of phone do you have available?	Private cell phone of staff, Landline of facility
The facility has functional computer.	yes
The facility has a functional printer.	yes
The facility has internet access.	yes
During the past 7 working days did you have internet for at least 1 hour every day?	yes
The administration shelf is filed and in order.	yes
Does the facility have a patient record system?	no
In which year was the patient record system introduced?	not applicable
Are there sufficient empty patient record cards available?	not applicable

### Table 6 Hygiene

	PHC - Leposavić
There is running water in the facility (out of the tap).	yes
There is warm water available (out of the tap).	yes
Is there routinely a time of year when this facility has a severe shortage or lack of water (out of the tap)?	yes
If yes, SPECIFY when:	Tokom letnjeg perioda
If yes: In case there is a severe shortage or lack of water (out of the tap), where do you fetch water?	Well (protected)
Functional washing points exist in examination rooms and/or entrance hall, and soap or hand disinfectants and water are available.	yes
Labelled containers for medical waste disposal are available in all required areas (e.g. examination rooms).	yes
The facility has adequate and safe disposal of sharps (sharps box/container).	yes
The facility has adequate and safe disposal of infectious waste.	no
Sharps waste is temporary stored at a protected place.	yes
There is regular and appropriate collection for infectious waste.	no
There is regular and appropriate collection for sharps waste.	yes
The facility has essential disinfectants and antiseptics.	yes
The facility has chlorine solution or other disinfectants to disinfect contaminated instruments in all required areas (e.g. in examination rooms).	yes
The facility has at least one accessible and functional toilet for patients.	yes
The facility has at least one accessible and functional toilet for staff.	yes
The toilet(s) or latrine is clean.	no
A washing point is available near the toilet or latrine.	yes
Soap and water are available at the washing point near toilet or latrine.	no

### Table 7 Public accountability items

	PHC - Leposavić
Facility visibly displayed	yes
Opening hours visible	yes
Phone number displayed	yes
Tariffs displayed	yes
Ministry of Health (MoH) complaints number displayed	yes
Flyer about MoH complaints number available	no
Tobacco laws displayed	yes
Patient's rights and responsibilities displayed	yes
Logos of pharmaceutical industries showing	no
Mechanisms to give public opinion on the service	yes
Mechanisms for referrals available	no
Year of last quality inspection by the Ministry	2017

### Table 8 Availability of guidelines and information materials

	PHC - Leposavić
Therapeutic standard guideline for PHC	yes
List of essential drugs	yes
Calendar for health promotion	yes
Vaccination calendar	yes
Are awareness materials based on standard package info	yes

### Table 9 Availability of general medical equipment

Facility	PHC - Leposavić
Microsurgery	not available
Nebulizer	available, functional
Ambu mask	available, functional
Strong source of light in good condition (portable)	available, functional
Nasal speculum	available, functional
Otoscope	available, not functional
Ophthalmoscope	not available
Doppler	not available
Glucometer	available, functional
Peak flow meter	not available
Tape measure	available, functional
Pen light	available, functional
Head light	available, functional
Neurological hammer	available, functional
Weight scale for adults	available, functional

Facility	PHC - Leposavić
Weight scale for children (over 2 years old)	available, functional
Weight scale for infants and toddlers (up to 2 years old)	available, functional
Sphygmomanometer for children	available, functional
Sphygmomanometer for adults	available, functional
Stethoscope for children	available, functional
Stethoscope for adults	available, functional
Obstetrical stethoscope/Fetoscope	not available
Pelvimeter	not available
Sterilization equipment and anti-septical protocol	available, not functional
Pulse oximeter	available, functional
Refrigerator	available, functional
Vaccine refrigerator/portable	available, functional
Height meter board for children (up to two years old)	available, functional
Meter for height measuring (children over 2 years old)	available, functional
Thermometer	available, functional
Tuning fork	not available
Table for vision testing	not available
Ear syringe	available, functional
Scissors	available, not functional
Timer	available, functional
Snellen eye chart	not available
Children growth chart	available
Tongue depressor	available

### Table 10 Availability of Gynaecological service equipment

	PHC - Leposavić
Gynaecological bed	available, functional
Gynaecological instruments	available, functional
Oxygen tank (tube)	available, functional
Vaginal speculum, small size	available
Vaginal speculum, medium size	available
Vaginal speculum, large size	available
Pap smear materials: (brush, spatula, holder)	not available
Gloves (latex)	available
Masks for doctors	available

#### Table 11 Availability of advanced equipment

	PHC - Leposavić
EKG machine	available, not functional
Sterilizer/Autoclave	available, functional
Photometer	not available
Centrifuge	available, functional
X-ray	available, functional
Defibrillator	not available
Ultrasound machine	available, not functional
Microscope	available, functional

Table 12 Availability of equipment to assess and monitor child growth

	PHC - Leposavić
Box of blocks in different colours	no
Rattle, small red ball hung in a piece of thread	no
Book with simple illustrations or some sheets of colour paper with illustrations, i.e. a flower, a girl, a car, a cat, etc.	no
Large and thin pencils, sheets of paper for drawings	no
Doll	yes
Hairbrush	no
Small plate and spoon	no
Cups	no
Simple puzzles with 2-3 pieces	no
Sheet with stripes and shapes	no

#### Table 13 Availability of medical products

Facility	PHC - Leposavić
Vaccines	yes
Water for injections	yes
Atropine sulphate	no
Dextrose solution	yes
Manitol solution	no
Diazepam	yes
Adrenaline / epinephrine	yes
Furosemid	yes
Natrium chloride solution	yes
Glyceryl trinitrate/nitroglycerin	no
Dexamethason	yes
Antitetanus serum	yes
Antivenom imunoglobulin/antivipera serum	yes
Oral rehydratation salt/tresol (o.r.s)	no
Benzylpenicillin/ bipenicillin	no
Metoclopramide/ methochopramid	no
Paracetamol/acetaminophen	no
Morphine sulphate	no
Diclofenac	yes
Salbutamol (nebulizer)	no
Hydrocortisone	yes
Contraceptives: oral (COC, POP), Injectables, DIU, Condoms	no
Emergency conceptive pill/levonorgestrel	no
Plastic syringes	yes
Needles for syringes	yes
Povidon jod/iodine solution	yes
Surgical gloves	yes
Amoxicillin/erythromycin	no
Chloropiramine/chlorfeniramin (oral antihistamine)	no
Acid acetylsalicylic/aspirin	no
Atenolol/metoprolol	no
Sol. glucose	yes
Hyoscine butylbromide/buscopan	yes
Folic acid	no
Oxygen	yes
Bandages	yes
Gauze	yes
Hydrogen peroxide	yes

Facility	PHC - Leposavić
Hydrophilic cotton	yes
Plastic perfusion system	yes
Spiritus aethylicus 70% (alcohol)	yes
Ranitidine	yes
Magnesium sulphate	no
Suture/thread for stitching wounds	yes
Kalium (potassium) iodine	no
Test strips for Glucometer	yes
Urine protein test strips	no
Urine ketones test strips	no
Urine microalbuminuria test strips	no
Fluorescein strips	no
Blood cholesterol assay	yes
Lipid profile	yes
Serum creatinine assay	yes

### 3.2.4 Clinical Observations

Table 14 Clinical observations overview table

	PHC – Leposavić % (n=69)
Number of observations (patients)	100%
- women	64% (44)
Observations by type of doctors	
- Family Medical Specialist	0% (0)
- General Practitioner	100% (69)
- Other Specialist	0% (0)
Age of patient	
- <5	0% (0)
- 5 - 18	0% (0)
- 19 - 49	58% (40)
- 50 - 65	28% (19)
- >65	14% (10)
Reason for visit	
- Hypertension	6% (4)
- Diabetes	0% (0)
- Other	51% (35)
-Referral	43% (30)

#### Table 15 Adherence to principles of history and physical examination

	PHC – Leposavić (n=69)
<ul> <li>The medical doctor adheres to principles of history and physical examination, i.e</li> <li>Greets the client</li> <li>Sees the client in privacy/confidentiality</li> <li>Makes the client comfortable (e.g. Seat offered)</li> <li>Asks the client about concerns, allows client to explain his/her health issue</li> <li>Has the patient record</li> <li>Uses the patient record during consultation</li> <li>Documents consultation in patient record (of all who have the patient record)</li> <li>Closed politely the consultation</li> </ul>	86% (83% - 89%)

### Table 16 Infection prevention and control

	PHC – Leposavić (n=69)
<ul> <li>The medical doctor pays attention to infection prevention and control, i.e</li> <li>Washes hands before the procedure</li> <li>Washes hands after procedure</li> <li>Applied proper decontamination procedures</li> <li>Puts on gloves where required</li> <li>Puts on a mask where required</li> </ul>	11% (0% - 33%)

#### Table 17 Patients with diabetes

Diabetes	PHC – Leposavić (n= 0)
The medical doctor	
Asks questions, about - Any specific health complaints - General weakness - Urine discharge - Vulvovaginitis or pruritus - Appetite - Eye-sight - Visit to opthalmalogist - Alcohol - Smoking - Using other medicine - Sedentary way of life - Adherence with diabetes treatment (if applicable)	Not applicable
<ul> <li>Conducts examinations, i.e</li> <li>Checks blood pressure</li> <li>Weight measurement / calculation of body-mass index</li> <li>Of skin, mucus membranes, nodes of lymph, ears, nose, thyroid glands</li> <li>Of eyes</li> <li>Of chest, auscultation of lungs</li> <li>Auscultation of heart</li> <li>Of abdomen, palpation of liver and signs of percussion</li> <li>Perfusion of legs (veins and feeling of legs)</li> <li>And gives clear explanations to the client concerning the purpose of tests and procedures.</li> </ul>	Not applicable
<ul> <li>Advices, explains and instructs, about</li> <li>Results of examinations</li> <li>The situation and diagnosis</li> <li>The prognosis</li> <li>About needed examinations - Nutrition, i.e. Food intake and weight decrease</li> <li>On the prevention and treatment of hypoglycaemia and other acute and chronic complications of diabetes</li> <li>On self-monitoring - glycemia control and prevention of hypoglycaemia</li> <li>About alcohol</li> <li>About smoking</li> <li>About physical exercise</li> <li>Right ways of care of legs</li> <li>Potential complication of the illness</li> <li>Potential risks if illness is not treated</li> <li>Importance of adherence to treatment</li> <li>About the referral (if applicable)</li> <li>On prescribed medicines/treatment (if applicable)</li> </ul>	Not applicable
Overall Score	Not applicable

### Table 18 Patients with hypertension

Hypertension	PHC – Leposavić (n=4)
The medical doctor	
Asks questions, about         - Any specific health complaints         - Headache         - The use of medicine other than for hypertension         - The use of contraceptives         - Eye-sight         - Visit to ophthalmologist         - Alcohol         - Smoking         - Sedentary way of life         - High blood pressure (if applicable)         - Adherence with hypertension treatment (if applicable)	46% (28% - 64%)
<ul> <li>Conducts examinations, i.e</li> <li>Checks blood pressure</li> <li>Weight measurement / calculation of body-mass index</li> <li>Of skin, mucus membranes, nodes of lymph, ears, nose, thyroid glands</li> <li>Of eyes</li> <li>Of chest, auscultation of lungs</li> <li>Auscultation of heart</li> <li>Of abdomen, palpation of liver and signs of percussion, palpation of kidneys</li> <li>Perfusion of legs (pulse and perfusion of legs)</li> <li>And gives clear explanations to the client concerning the purpose of tests and procedures. Checks blood pressure</li> </ul>	11% (not available)
Advices, explains and instructs, about - Results of examinations - The situation and diagnosis - The prognosis - About needed examinations - About signs of extreme hypertension - About signs of extreme hypertension occur - Nutrition, i.e. food intake - About what to do when signs of extreme hypertension occur - Nutrition, i.e. food intake - About alcohol - About smoking - About physical exercise - About oral contraceptives - Potential complication of the illness - Potential risks if illness is not treated - Importance of adherence to treatment - About follow-up visit - About the referral (if applicable) - On prescribed medicines/treatment (if applicable)	31% (17% - 44%)
Overall Score	30% (19% - 41%)

Table 19 Patients consulting for other reasons than diabetes or hypertension

Other diseases	PHC – Leposavić (n=35)
The medical doctor	
Asks questions, about - Takes patient history (general history, specific to disease) - Asks open ended questions during history taking - Asks about any prescriptions the client is currently taking. - Listens to the client and responds to client questions.	82% (76% - 88%)
<ul> <li>Conducts examinations, i.e</li> <li>Performs medical examinations and other investigations as individually required.</li> <li>Gives clear explanations to the patient concerning the purpose of medical examinations and other investigations.</li> </ul>	30% (14% - 46%)
Advices, explains and instructs, about - Results of examinations - The situation and diagnosis - The prognosis - About needed examinations - About follow-up visit - About the referral (if applicable) - On prescribed medicines/treatment (if applicable) - On risks factors/health education (if applicable)	26% (19% - 34%)
Overall Score	48% (42% - 53%)

### Table 20 Patients consulting for referrals

Referrals	PHC – Leposavić (n=30)
The medical doctor	•
Asks questions, about - Takes patient history (general history, specific to disease) - Asks open ended questions during history taking - Asks about any prescriptions the client is currently taking. - Listens to the client and responds to client questions.	76% (71% - 81%)
<ul> <li>Conducts examinations, i.e</li> <li>Performs medical examinations and other investigations as individually required.</li> <li>Gives clear explanations to the patient concerning the purpose of medical examinations and other investigations.</li> </ul>	100% (not available)
Advices, explains and instructs, about - Results of examinations - The situation and diagnosis - The prognosis - About needed examinations - About follow-up visit - About the referral (if applicable) - On prescribed medicines/treatment (if applicable) - On risks factors/health education (if applicable)	27% (22% - 32%)
Overall Score	44% (40% - 49%)

### 3.2.5 Exit Interviews

Table 21 Socio-demographic attributes among respondents of exit interviews

	PHC – Leposavić % (n=53)
Number of interviews	100%
- Women	49% (26)
Education	
- Never attended school	0% (0)
- Completed lower primary school	2% (1)
- Completed primary school	8% (4)
- Completed high school	49% (26)
- Completed college / university	32% (17)
- Other	9% (5)
Occupation	
- Farmer	13% (7)
- Employed	23% (12)
- Self-employed	21% (11)
- Housewife	4% (2)
- Governmental employee	11% (6)
- Unemployed	21% (11)
- Pensioner	2% (1)
- Pupil/Student	0% (0)
- Other	6% (3)
Economic or social aid	11% (6)

### Table 22 Frequency and reason of visit of exit interviews

	PHC – Leposavić % (n=53)
Excluding today: how often did you access this HC over the past 3	month?
- Did not access this HC in the past 3 months	62% (33)
- 1-3 times	30% (16)
- More than 3 times	8% (4)
What was the reason for your consultation today?	
- Chronic condition	25% (13)
- Antenatal care	2% (1)
- Child health	8% (4)
- Immunisation	0% (0)
- Other	66% (35)

#### Table 23 Overall satisfaction with health services - exit interviews

	PHC – Leposavić % (n=53)
Overall: How satisfied were you with the services you received today	
Very unsatisfied	0% (0)
Unsatisfied	11% (6)
Satisfied	83% (44)
Very satisfied	6% (3)

#### Table 24 Satisfaction with different aspects of health service - exit interviews

	PHC – Leposavić % (n=53)
Patient was given the opportunity to explain the health problem	94% (50)
Patients privacy was ensured	96% (51)
Doctor explained the questioning and physical examinations and the health problem*	82% (18)
Doctor explained the intake of prescribed medicine**	29% (6)
Doctor asked if patient currently takes prescriptions	23% (12)
Patient was given chance to ask questions about the investigation, health problem and treatment	89% (47)
Doctor listened carefully to patients concerns and questions and gave satisfactory answers	79% (42)
Patient got advice on health problem	58% (31)
Medical doctor was polite during consultation	98% (52)

\* relevant only when examination was conducted; \*\* only relevant if medicine were prescribed

#### Table 25 Payment for health service - exit interviews

	PHC – Leposavić % (n=53)
Did you pay today for your health consultation?	0% (0)
Did you get a receipt for your payment?	Not applicable

Quality of Care Assessment - Clinical observation         Interviewer_ID         IMEI (International Mobile Equipment Identity)         Date of interview         Start time of interview         Name of municipality         Name of facility         Good morning! My name is [NAME]. We are here on behalf of the Accessible Quality Healthcare Project funded by the Swiss Development Cooperation to conduct a survey of selected health facilities of the project. The objective of this study is to assess the quality of health care services provided in health facilities. The Ministry of Health and ethical review board has approved this study.         Your experiences are very important to improve aspects related to quality of care. Information collected from this interview/questionnaire will be used by the Accessible Quality Healthcare Project. Summaries of findings might also be shared with municipal or national authorities.	Answers

interested in your disease or disease history but want to observe some	
aspects on the care that the doctor provides to you. You are free to	
decide whether or not you participate in this study. If you decide not to do	
it, there will be no negative effect.	
Do I have your agreement to observe your consultation?	yes no
	10
Is the patient during the consultation present?	yes

The objective of this study is to assess the quality of health care services provided in health facilities. The Ministry of Health and the ethical review board has approved this study. We would like to interview people who have today consulted the medical doctor for their own health issues or for a child. Your experiences are very important to improve aspects related to quality of care. Information collected from this interview/questionnaire will be used by Accessible Quality Healthcare Project. Summaries of findings might also be shared with regional or national authorities. The information collected from you will be kept confidential within the research team. Instead of using your name, we will give a non-personal identification number which cannot be traced individually. You are free to decide whether or not you participate in this study. If you decide not to do

	Any other food?
PLEASE SPECIFY	
	strongly agree
	agree
How much do you agree with the following statement: Unsafe water, poor	neither agree, nor disagree
sanitation and hygiene can cause the diarrhea but not ARI	disagree
Nen communicable diseases	strongly disagree
Non-communicable diseases	
	diabetes
	high blood pressure
	high blood pressure obesity
Which risk factors for cardiovascular disease do you know?	high blood pressure obesity smoking/tobacco use (Nos)
Which risk factors for cardiovascular disease do you know?	high blood pressure obesity
Which risk factors for cardiovascular disease do you know?	high blood pressure obesity smoking/tobacco use (Nos)
Which risk factors for cardiovascular disease do you know?	high blood pressure obesity smoking/tobacco use (Nos) high cholesterol/high blood fat

	age
	stress
	other
	don't know
	none
	left-sided chest pain
	headache
Which of the following is a typical symptom of a heart attack?	feeling thirsty
	pain in the legs
	don't know
	frequent need to urinate
	lower back pain
Which of the following is not a typical symptom caused by diabetes?	tiredness
	unexplained weight loss
	don't know
	strongly agree
	agree
How much do you agree with the following statement: Overweight people are healthier.	neither agree, nor disagree
	disagree
	strongly disagree
	strongly agree
	agree
How much do you agree with the following statement: Smoking does not	neither agree, nor disagree
effect the health.	disagree
	strongly disagree
	strongly agree
	agree
How much do you agree with the following statement: Changing my	neither agree, nor disagree
lifestyle today will not affect my health later.	disagree
	strongly disagree
	strongly agree
	agree
How much do you agree with the following statement: I cannot influence	neither agree, nor disagree
my health because it depends on the doctors.	disagree
	strongly disagree
	no, not at the moment
Are you currently taking measures to have a healthy lifestyle?	I am trying from time to time
	yes, sometimes
	yes frequently
	not motivated
	rather not motivated
How motivated are you to change your lifestlye?	rather motivated
	motivated
	do more physical exercise
	lose weight
	eat less fat
What have you already changed in your life to decrease your risk of	eat less sugar
getting cardiovascular disease? (do not read responses)	eat more fruits and vegetables
	stop smoking /stop using Nos
	control my diabetes more actively (if applicable)
	control my high blood pressure
	more actively (if applicable)

	I have never tried
Now a few last questions
