## Acknowledgements

We are very thankful to Ms. Debra Stevenson, Dr. Qamile Ramadani and Dr. Merita Shehu and all the AQH staff for providing overall support to the study. We warmly thank our local study coordinator Dr. Pranvera Krasniqi and Dr. Myvedete Tershnjaku from the National Institute of Public Health Kosovo for their commitment and support in the implementation and quality assurance of the study. We would also like to thank Ms. Fetije Huruglica, Ms. Fekrije Hasani and Mr. Srdjan Simonović who supported in collecting the data relevant for the sampling of the study. Further, we are grateful to Applicable Research Solutions and its staff for ensuring a smooth implementation of data collection and field supervision. Specifically we would like to highlight the excellent work from our data collectors. Lastly we would like to express our gratitude to all participants in our survey including facility managers, doctors and patients.

## 1 Background & Objectives

The Accessible Quality Healthcare (AQH) project in Kosovo is funded by the Swiss Agency for Development and Cooperation (SDC) and implemented by a Consortium comprising Swiss Tropical and Public Health Institute (Swiss TPH) and Save the Children. The overall goal of the AQH project is to ensure that the health of the population of Kosovo has improved, with strengthened healthcare providers and managers able to meet the needs of the patients (especially vulnerable groups), who are more aware of their rights and needs.

At the request of the Ministry of Health, the AQH project conducted the first national **facility-based Quality of Care (QoC) study** from August to October 2018.

The objective of the study was to measure the quality of care related to structural and procedural aspects, as well as selected outcomes, in Primary Health Care (PHC) in all 38 municipalities in Kosovo.

The specific objectives of this study were to provide PHC service providers with information to:

- Assess the quality of health services provided in several PHC centres in each municipality, including specific structural and procedural aspects.
- Allow comparison of different aspects of quality of care between all municipalities.
- Determine to what degree health providers have infrastructure and consumables available as outlined in the national PHC norms or, where these are unavailable, those outlined in WHO standards.
- Assess patient satisfaction with the services provided at PHC centres.

For this study we considered an operational definition of the quality of health services based on the concept of quality of care presented by Donabedian (1988, 1990), which has frequently been used in similar studies (Boller and Wyss et al., 2003; Matthys, 2013; Kiefer and Kadesha, 2015; Lechthaler, 2015; AQH, 2016). This is characterized by three dimensions:

1) <u>Structural attributes</u> - relate to the setting where health care is provided. These attributes mostly refer to the organizational structure, human and financial resources, as well as availability of technical resources such as clinical protocols and guidelines.

<u>2) Process attributes</u> - relate to the provider-client interaction, for example professional conduct and technical competence, as well as interpersonal relations/client satisfaction.

<u>3) Outcome attributes</u> - relate to the effect of care delivery on the health status of populations. Outcomes result from the structural and process attributes, for example, survival and recovery of patients or, more indirectly, patient satisfaction.

This operational definition is based on the assumption that the three dimensions are connected to each other and ultimately to service quality: good structure increases the likelihood of good processes and good process increases the likelihood of good outcomes, although outcomes are a consequence rather than a component of the quality of services.

## 2 Methodology

## 2.1 Study design

The QoC study is designed as a facility-based cross sectional survey to measure aspects of the quality of care of PHC service. It captures the overall quality of the facility infrastructure (structural aspects), the quality of provider-patient interactions (process aspects) and patient satisfaction after consultation (outcome). The study assesses quality of care provided to all patient groups but particularly focuses on patients with diabetes and hypertension.

The modules for the QoC survey are based on a mix of indicators from the WHO Service Availability and Readiness Assessment (SARA) and the "Tool to Improve Quality of Health Care" within the "ACCESS" program supported by the Novartis Foundation for Sustainable Development (2014), as relevant. The modules were adapted to the Kosovo local context thereby taking into consideration the national PHC norms or, where these are unavailable, the WHO norms established in the Package of Essential Non Communicable Diseases (NCDs) Interventions.

## 2.2 Study area & target population

The survey was implemented in all municipalities. The QoC survey targets PHC facilities in both rural and urban areas. During the survey data was collected at three different levels: 1) the health facility, 2) the health provider and 3) the patients.

#### Inclusion criteria for the baseline assessment

Inclusion criteria for the <u>health facilities</u> were as follows:

- Main Family Medicine Centre (MFMC) or Family Medicine Centre (FMC)
- At least one medical doctor assigned to the facility for at least one day per week

Inclusion criteria for <u>health providers</u> of the selected facilities for provider-patient observations were:

- Doctors providing PHC services
- Patients (18 years or older, or children accompanied by a legal representative) accessing the facility and receiving a consultation from a health provider
- Oral informed consent provided by the provider
- Oral informed consent provided by the patient or his/her legal representative (mother/father/caretaker)

Inclusion criteria for <u>patients</u> accessing the selected facilities and receiving consultation were:

- Patients (18 years or older, or children accompanied by a legal representative) accessing the facility and receiving a consultation from a health provider
- Oral informed consent provided by the patient or his/her legal representative (mother/father/caretaker)
- Accessing the facility to receive services either for themselves or their accompanying minors.

## 2.3 Sample size and sampling strategy

#### Sampling of health facilities

We applied a random proportional-to-size sampling procedure for each of the domains assuming that the facilities will be allocated to urban and rural areas proportional to the size of

urban and rural populations in the region. The number of daily visits in June 2018 is considered a proxy of daily attendances.

#### Sampling of providers for provider-client observations

<u>All</u> provider-patient consultations, for which informed consent could be obtained from the patient or their legal representative, were observed in each health facility "Provider" hereby only refers to medical doctors (see inclusion criteria). A healthcare provider could but did not have to be observed repeatedly.

#### Sampling of patients for exit interviews

For the exit interviews, <u>all</u> patients that received care for themselves, or for a child in their care, at the facility were interviewed for the exit interview, provided they gave consent<sup>1</sup>. The patients included for exit interviews did not necessarily need to be the same as for the provider-patient observation (see inclusion criteria).

### 2.4 Data collection and analysis

#### Data collection

Before data collection, relevant authorities, specifically Directors for Health and Social Welfare (DHSW), mayors as well as managers of all selected facilities in all surveyed Municipalities were informed about the study, its purpose and its schedule at a meeting hosted by the Ministry of Health on 5<sup>th</sup> July 2018.

The data collection team consisted of 23 data collectors, divided into 10 sub-teams. Most data collectors had a background in medical training and public health and previous survey experience. Each data collection team was assigned to a set of designated facilities where they conducted the assessments. The data collection teams were closely monitored by the local study coordinator and supervisors. Data collection in the field took place from 10 September 2018 until 05 October 2018.

The following procedures were followed at each facility:

- 1) Introduction of purpose and procedures of the survey to the targeted service providers.
- 2) Data collection
  - Starting with provider-patient observations and exit interviews with patients conducted at the facility.
  - Exit interviews with clients were conducted in an appropriate location ensuring privacy and confidentiality.
  - Structural attributes related to infrastructure and management were assessed after the consultation hours in the afternoon.

Data collection was performed electronically using the Open Data Kit (ODK)<sup>2</sup> software on tablets. During and after each day of data collection, the local study coordinator and the supervisors conducted quality assurance.

#### Data analysis

During the analysis of the obtained data, full confidentiality of respondents was assured. Data was analysed using Stata Statistical Software/SE v15.0.

Additive index: The overall scores were calculated as additive indices to indicate the achieved percentage score. For a certain set of questions, e.g. infection prevention and control measures the additive index counts the answers/criteria which were fulfilled or not fulfilled. Questions/criteria which are not applicable were not considered. The number of positive

<sup>&</sup>lt;sup>1</sup> Depending on the capacity of the data collectors.

<sup>&</sup>lt;sup>2</sup> Open Data Kit (ODK) is a free and open-source set of tools for mobile data collection solutions. https://opendatakit.org/

answers is then divided by the total of valid answers (ratio). This way a percentage score is obtained for **each patient**.

Example: For infection prevention and control measures we measured five different aspects. For the first patient none of the aspects we measured was relevant, e.g. no examinations were done.

For the second patient only two of the five aspects were relevant: hand washing before and after the examination. Both actions were not observed. Hence this person had two valid answers but did not achieve any score. So the percentage score achieved for this person was 0.

For the third patient all five actions related to infection prevention and control measures were relevant. However, none of the five actions were observed. So the percentage score is yet once more 0.

The fourth patient was examined and instruments were used. Thus three aspects were relevant, but only one aspect (disinfection of instruments) observed. Hence 1 out of 3 were achieved, translating to a percentage score of 33%.

For the fifth patient all five aspects were considered relevant and all were also adhered to by the doctor. Hence for this person a percentage score of 100% was achieved.

The average index **for the facility** for infection and prevention measures would be calculated as 133/4=33%

Patient	Washed hands before	Washed hands after	Disinfected instruments	used gloves as required	used mask as required	Number of valid answers	Number of positive answers	Ratio (positive/valid answers)
1	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a
2	no	no	n/a	n/a	n/a	2	0	0
3	no	no	no	no	no	5	0	0
4	no	no	yes	n/a	n/a	3	1	33
5	yes	yes	yes	yes	yes	5	5	100
						Facil	ity Score	133/4=33

Yes/no: as observed; n/a: action was not needed, e.g. no examination conducted

**95% - CI**: A 95% confidence interval (CI) is used to analyse the data presented in Tables 15 - 20 whereby the average is a range with an upper and lower number calculated from a sample. Because the true population average is unknown, this range describes possible values that the mean could be. If multiple samples were drawn from the same population and a 95% CI calculated for each sample, we would expect the population mean to be found within 95% of these CIs. CIs are sensitive to variability in the population (spread of values) and sample size. We could say: we are confident that the real value lies somewhere within this value range. A confidence interval cannot be estimated if there is only one observation or if there is no variation of values.

#### n: number of observations in the sample

**Rank**: The rank provides an indication on the position of the municipality related to certain aspects. In other words: how does the municipality perform in comparison to the other 37 municipalities. In case of ties (=municipalities achieving the same score) the average rank is calculated and assigned, e.g. achievement scores are for two facilities 90, then their potential ranks 8 and 9 and are taken together and divided by 2. This results in the rank 8.5. Hence there is no rank 8 or 9 assigned and the next municipality would be assigned the rank 10.

### 2.5 Limitations

#### Sample size

The study was designed as a nationwide survey. Hence, in comparison to a census, only randomly selected facilities were included in the study. Due to the different sizes of the municipalities, but also the different utilization patterns in the different municipalities, some municipalities had more facilities included than others. Some of the municipalities had only the MFMC and 1 FMC included. This limits our ability to show possible wider variations in these municipalities.

In addition some facilities had only a few visits from patients on the day(s) of the survey. Thus the numbers of observations or exit interviews varies substantially between the facilities.

#### Interviewer bias

Interviewers were trained and received clear instructions on the data collection, nevertheless variations between interviewers cannot be completely ruled-out.

#### **Clinical observations**

The observations protocols for diabetic and hypertensive patients were very detailed in comparison to other illnesses. Hence, this might partially explain achievement differences between those illnesses and all other.

### 2.6 Ethical considerations

Before the interviews and observations, participants were given an information leaflet and asked for their consent. For this, participants were informed that a) their participation is voluntary, b) they can withdraw from participation at any time without any consequences, c) non-participation will not have any negative effects. Participants were also informed how the data will be used and that confidentiality is ensured as no names or other identifying aspects will be collected.

Ethical clearance was obtained from the Kosovo Medical Chamber on 3<sup>rd</sup> of August, 2018 (Reference Number: 04/2018).

## 3 Results

## 3.1 Summary of results for municipality Therandë

#### 3.1.1 Infrastructure

- Three facilities were part of the study (MFMC, FMC Stundenqan, FMC Mohlan).
- The MFMC offered most services. Both FMCs offered substantially less services.
- The MFMC was also overall well kept.
- The FMC Mohlan, especially, experienced some difficulties with the facility infrastructure, e.g. power shortages, functional heating system, functional computer etc.
- Challenging were also some hygienic aspects, e.g. appropriate collection for infectious waste or sharps at the MFMC and the FMC Mohlan.
- Public accountability items were variedly displayed, both within and across the facilities.
- The availability of guidelines and information materials was partially missing in all facilities.
- The general medical equipment and medical products were missing in all facilities.
- Gynaecological service equipment and advanced equipment was predominantly available at the MFMC only.
- Equipment to assess and monitor child growth was not found in any of the 3 facilities.

### 3.1.2 Clinical observation

- A total of 53 clinical observations were conducted (39 at the MFMC, 11 at the FMC Stundenqan, 3 at FMC – Mohlan).
- The majority of patients (29) consulted for other medical issues.
- 11 patients consulted for hypertension and 5 on diabetes.
- Adherence to principles of patient history taking and physical examination was 83% at all three facilities. This means that across the different patients and facilities the doctors adhered to the majority of aspects that were checked, e.g. greeting the patient, seeing the patient in privacy, etc.
- Infection prevention and control was not very satisfactory at any of the facilities. The scores indicate that in cases where infection prevention and control measures were needed, they were often not performed.
- Achievement levels regarding diabetes treatment were varied with 54% achievement at the MFMC and 20% at the FMC – Stundenqan. Differences between the facilities were observed along all aspects, e.g. asking question, conducting examinations and giving advice.
- Achievement levels related to hypertension were at 44% for both facilities (MFMC Therandë and FMC – Stundengan).
- Consultations for reasons other than diabetes or hypertension scored substantially better (65% 81%). Across facilities very good scores were achieved for asking the patients questions and conducting examinations.

#### 3.1.3 Exit Interviews

- In total 38 patients (20 women) were interviewed.
- Half of the patients were satisfied with the service they had received.
- Specifically, at the MFMC, the majority of patients were unsatisfied or very unsatisfied. Patients expressed dissatisfaction for "doctor asked if patient currently takes prescriptions"; "Patient was given chance to ask questions about the investigation, health problem and treatment"; "Doctor listened carefully to patients concerns and questions and gave satisfactory answers" and "Patient got advice on health problem".
- All patients who had to pay for the services, had received receipts.

## 3.2 Detailed information on results

	MFMC	FMC - Stundenqan	FMC - Mohlan
Box of blocks in different colours	no	no	no
Rattle, small red ball hung in a piece of thread	no	no	no
Book with simple illustrations or some sheets of colour paper with illustrations, i.e. a flower, a girl, a car, a cat, etc.	no	no	no
Large and thin pencils, sheets of paper for drawings	no	no	no
Doll	no	no	no
Hairbrush	no	no	no
Small plate and spoon	no	no	no
Cups	no	no	no
Simple puzzles with 2-3 pieces	no	no	no
Sheet with stripes and shapes	no	no	no

#### Table 13 Availability of medical products

Facility	MFMC	FMC - Stundenqan	FMC - Mohlan
Vaccines	yes	yes	no
Water for injections	yes	yes	yes
Atropine sulphate	yes	no	no
Dextrose solution	no	yes	yes
Manitol solution	no	no	no
Diazepam	yes	yes	yes
Adrenaline / epinephrine	yes	yes	yes
Furosemid	yes	yes	yes
Natrium chloride solution	no	yes	yes
Glyceryl trinitrate/nitroglycerin	no	yes	no
Dexamethason	yes	yes	yes
Antitetanus serum	no	no	no
Antivenom imunoglobulin/antivipera serum	no	no	no
Oral rehydratation salt/tresol (o.r.s)	no	yes	yes
Benzylpenicillin/ bipenicillin	no	no	no
Metoclopramide/ methochopramid	no	no	no
Paracetamol/acetaminophen	no	yes	yes
Morphine sulphate	no	no	no
Diclofenac	yes	yes	yes
Salbutamol (nebulizer)	yes	yes	yes
Hydrocortisone	no	yes	no
Contraceptives: oral (COC, POP), Injectables, DIU, Condoms	no	no	no
Emergency conceptive pill/levonorgestrel	no	no	no
Plastic syringes	yes	yes	yes
Needles for syringes	no	yes	yes
Povidon jod/iodine solution	no	yes	yes
Surgical gloves	yes	yes	no
Amoxicillin/erythromycin	yes	yes	yes
Chloropiramine/chlorfeniramin (oral antihistamine)	no	yes	yes
Acid acetylsalicylic/aspirin	yes	yes	yes
Atenolol/metoprolol	no	yes	no
Sol. glucose	no	yes	yes
Hyoscine butylbromide/buscopan	no	no	no
Folic acid	no	no	no
Oxygen	no	yes	yes
Bandages	no	yes	yes
Gauze	no	yes	yes

Facility	MFMC	FMC - Stundenqan	FMC - Mohlan
Hydrogen peroxide	no	yes	yes
Hydrophilic cotton	yes	yes	yes
Plastic perfusion system	yes	yes	yes
Spiritus aethylicus 70% (alcohol)	no	yes	yes
Ranitidine	yes	yes	yes
Magnesium sulphate	no	no	no
Suture/thread for stitching wounds	no	yes	yes
Kalium (potassium) iodine	no	no	no
Test strips for Glucometer	yes	yes	no
Urine protein test strips	yes	yes	no
Urine ketones test strips	yes	yes	no
Urine microalbuminuria test strips	yes	yes	no
Fluorescein strips	no	no	no
Blood cholesterol assay	yes	no	no
Lipid profile	yes	no	no
Serum creatinine assay	yes	no	no

#### 3.2.4 Clinical Observations

Table 14 Clinical observations overview table

	MFMC % (n=39)	FMC – Stundenqan % (n=11)	FMC – Mohlan % (n=3)
Number of observations (patients)	100%	100%	100%
- women	67% (26)	45% (5)	33% (1)
Observations by type of doctors			
- Family Medical Specialist	100% (39)	0% (0)	0% (0)
- General Practitioner	0% (0)	100% (11)	100% (3)
- Other Specialist	0% (0)	0% (0)	0% (0)
Age of patient			
- <5	5% (2)	0% (0)	0% (0)
- 5 - 18	5% (2)	27% (3)	33% (1)
- 19 - 49	64% (25)	45% (5)	33% (1)
- 50 - 65	13% (5)	9% (1)	0% (0)
- >65	13% (5)	18% (2)	33% (1)
Reason for visit		ł	
- Hypertension	18% (7)	36% (4)	0% (0)
- Diabetes	10% (4)	9% (1)	0% (0)
- Other	54% (21)	55% (6)	67% (2)
-Referral	18% (7)	0% (0)	33% (1)

#### Table 15 Adherence to principles of history and physical examination

	MFMC (n=39)	FMC - Stundenqan (n=11)	FMC - Mohlan (n=3)
<ul> <li>The medical doctor adheres to principles of history and physical examination, i.e</li> <li>Greets the client</li> <li>Sees the client in privacy/confidentiality</li> <li>Makes the client comfortable (e.g. Seat offered)</li> <li>Asks the client about concerns, allows client to explain his/her health issue</li> <li>Has the patient record</li> <li>Uses the patient record during consultation</li> <li>Documents consultation in patient record (of all who have the patient record)</li> <li>Closed politely the consultation</li> </ul>	83% (Not	83% (Not	83% (Not
	available)	available)	available)

Table 16 Infection prevention and control

	MFMC (n=39)	FMC - Stundenqan (n=11)	FMC - Mohlan (n=3)
The medical doctor pays attention to infection prevention and control, i.e - Washes hands before the procedure - Washes hands after procedure - Applied proper decontamination procedures - Puts on gloves where required - Puts on a mask where required	0% (Not available)	6% (0% - 17%)	0% (Not available)

#### Table 17 Patients with diabetes

Diabetes	MFMC (n=4)	FMC - Stundenqan (n=1)	FMC - Mohlan (n=0)
The medical doctor			
Asks questions, about - Any specific health complaints - General weakness - Urine discharge - Vulvovaginitis or pruritus - Appetite - Eye-sight - Visit to opthalmalogist - Alcohol - Smoking - Using other medicine - Sedentary way of life - Adherence with diabetes treatment (if applicable)	60% (52% - 67%)	36% (Not available)	Not applicable
<ul> <li>Conducts examinations, i.e</li> <li>Checks blood pressure</li> <li>Weight measurement / calculation of body-mass index</li> <li>Of skin, mucus membranes, nodes of lymph, ears, nose, thyroid glands</li> <li>Of eyes</li> <li>Of chest, auscultation of lungs</li> <li>Auscultation of heart</li> <li>Of abdomen, palpation of liver and signs of percussion</li> <li>Perfusion of legs (veins and feeling of legs)</li> <li>And gives clear explanations to the client concerning the purpose of tests and procedures.</li> </ul>	44% (29% - 60%)	0% (Not available)	Not applicable
<ul> <li>Advices, explains and instructs, about</li> <li>Results of examinations</li> <li>The situation and diagnosis</li> <li>The prognosis</li> <li>About needed examinations - Nutrition, i.e. Food intake and weight decrease</li> <li>On the prevention and treatment of hypoglycaemia and other acute and chronic complications of diabetes</li> <li>On self-monitoring - glycemia control and prevention of hypoglycaemia</li> <li>About alcohol</li> <li>About smoking</li> <li>About physical exercise</li> <li>Right ways of care of legs</li> <li>Potential complication of the illness</li> <li>Potential risks if illness is not treated</li> <li>Importance of adherence to treatment</li> <li>About the referral (if applicable)</li> <li>On prescribed medicines/treatment (if applicable)</li> </ul>	56% (50% - 63%)	20% (Not available)	Not applicable
Overall score	54% (47% - 61%)	20% (Not available)	Not applicable

Table 18 Patients with hypertension

Hypertension	MFMC (n=7)	FMC - Stundenqan (n=4)	FMC - Mohlan (n=0)	
The medical doctor				
Asks questions, about - Any specific health complaints - Headache - The use of medicine other than for hypertension - The use of contraceptives - Eye-sight - Visit to ophthalmologist - Alcohol - Smoking - Sedentary way of life - High blood pressure (if applicable) - Adherence with hypertension treatment (if applicable)	56% (46% - 66%)	52% (34% - 69%)	Not applicable	
<ul> <li>Conducts examinations, i.e</li> <li>Checks blood pressure</li> <li>Weight measurement / calculation of body-mass index</li> <li>Of skin, mucus membranes, nodes of lymph, ears, nose, thyroid glands</li> <li>Of eyes</li> <li>Of chest, auscultation of lungs</li> <li>Auscultation of heart</li> <li>Of abdomen, palpation of liver and signs of percussion, palpation of kidneys</li> <li>Perfusion of legs (pulse and perfusion of legs)</li> <li>And gives clear explanations to the client concerning the purpose of tests and procedures. Checks blood pressure</li> </ul>	32% (22% - 42%)	39% (28% - 50%)	Not applicable	
<ul> <li>Advices, explains and instructs, about</li> <li>Results of examinations</li> <li>The situation and diagnosis</li> <li>The prognosis</li> <li>About needed examinations</li> <li>About signs of extreme hypertension</li> <li>About what to do when signs of extreme hypertension occur</li> <li>Nutrition, i.e. food intake</li> <li>About alcohol</li> <li>About smoking</li> <li>About oral contraceptives</li> <li>Potential complication of the illness</li> <li>Potential risks if illness is not treated</li> <li>Importance of adherence to treatment</li> <li>About the referral (if applicable)</li> <li>On prescribed medicines/treatment (if applicable)</li> </ul>	42% (25% - 59%)	42% (31% - 53%)	Not applicable	
Overall Score	44% (31% - 56%)	44% (32% - 56%)	Not applicable	

#### Table 19 Patients consulting for other reasons than diabetes or hypertension

Other diseases	MFMC – Therandë (n=21)	FMC - Stundenqan (n=6)	FMC - Mohlan (n=2)
The medical doctor			
<ul> <li>Asks questions, about</li> <li>Takes patient history (general history, specific to disease)</li> <li>Asks open ended questions during history taking</li> <li>Asks about any prescriptions the client is currently taking.</li> <li>Listens to the client and responds to client questions.</li> </ul>	91% (82% - 99%)	92% (75% - 100%)	100% (Not available)
<ul> <li>Conducts examinations, i.e</li> <li>Performs medical examinations and other investigations as individually required.</li> <li>Gives clear explanations to the patient concerning the purpose of medical examinations and other investigations.</li> </ul>	92% (80% - 100%)	80% (56% - 100%)	100% (Not available)
Advices, explains and instructs, about - Results of examinations - The situation and diagnosis - The prognosis - About needed examinations - About follow-up visit - About the referral (if applicable) - On prescribed medicines/treatment (if applicable) - On risks factors/health education (if applicable)	72% (64% - 79%)	47% (26% - 68%)	65% (21% - 100%)
Overall Score	80% (74% - 86%)	65% (47% - 82%)	81% (58% - 100%)

Table 20 Patients consulting for referrals

Referrals	MFMC – Therandë (n=7)	FMC - Stundenqan (n=0)	FMC - Mohlan (n=1)
The medical doctor			
<ul> <li>Asks questions, about</li> <li>Takes patient history (general history, specific to disease)</li> <li>Asks open ended questions during history taking</li> <li>Asks about any prescriptions the client is currently taking.</li> <li>Listens to the client and responds to client questions.</li> </ul>	79% (51% - 100%)	Not applicable	100% (Not available)
<ul> <li>Conducts examinations, i.e</li> <li>Performs medical examinations and other investigations as individually required.</li> <li>Gives clear explanations to the patient concerning the purpose of medical examinations and other investigations.</li> </ul>	70% (31% - 100%)	Not applicable	Not applicable
Advices, explains and instructs, about - Results of examinations - The situation and diagnosis - The prognosis - About needed examinations - About follow-up visit - About the referral (if applicable) - On prescribed medicines/treatment (if applicable) - On risks factors/health education (if applicable)	55% (29% - 81%)	Not applicable	60% (Not available)
Overall Score	64% (51% - 77%)	Not applicable	78% (Not available)

### 3.2.5 Exit Interviews

Table 21 Socio-demographic attributes among respondents of exit interviews

	MFMC % (n=33)	FMC - Stundenqan % (n=4)	FMC - Mohlan % (n=1)
Number of interviews	100%	100%	100%
- Women	52% (17)	50% (2)	100% (1)
Education			
- Never attended school	3% (1)	0% (0)	0% (0)
- Completed lower primary school	6% (2)	0% (0)	0% (0)
- Completed primary school	18% (6)	25% (1)	0% (0)
- Completed high school	52% (17)	75% (3)	100% (1)
- Completed college / university	15% (5)	0% (0)	0% (0)
- Other	6% (2)	0% (0)	0% (0)
Occupation			
- Farmer	0% (0)	25% (1)	0% (0)
- Employed	9% (3)	0% (0)	0% (0)
- Self-employed	0% (0)	0% (0)	0% (0)
- Housewife	6% (2)	0% (0)	0% (0)
- Governmental employee	3% (1)	0% (0)	0% (0)
- Unemployed	42% (14)	50% (2)	0% (0)
- Pensioner	21% (7)	0% (0)	0% (0)
- Pupil/Student	0% (0)	0% (0)	0% (0)
- Other	18% (6)	25% (1)	0% (0)
Economic or social aid	24% (8)	25% (1)	0% (0)

#### Table 22 Frequency and reason of visit of exit interviews

	MFMC % (n=33)	FMC - Stundenqan % (n=4)	FMC - Mohlan % (n=1)
Excluding today: how often did you access this HC over	the past 3 month?		
- Did not access this HC in the past 3 months	9% (3)	25% (1)	0% (0)
- 1-3 times	36% (12)	25% (1)	100% (1)
- More than 3 times	55% (18)	50% (2)	0% (0)
What was the reason for your consultation today?			
- Chronic condition	30% (10)	25% (1)	0% (0)
- Antenatal care	0% (0)	0% (0)	0% (0)
- Child health	12% (4)	0% (0)	0% (0)
- Immunisation	0% (0)	0% (0)	0% (0)
- Other	58% (19)	75% (3)	100% (1)

#### Table 23 Overall satisfaction with health services - exit interviews

	MFMC % (n=33)	FMC - Stundenqan % (n=4)	FMC - Mohlan % (n=1)
Overall: How satisfied were you with the services you received today			
Very unsatisfied	18% (6)	0% (0)	0% (0)
Unsatisfied	33% (11)	25% (1)	0% (0)
Satisfied	33% (11)	75% (3)	0% (0)
Very satisfied	15% (5)	0% (0)	100% (1)

#### Table 24 Satisfaction with different aspects of health service - exit interviews

	MFMC % (n=33)	FMC - Stundenqan % (n=4)	FMC - Mohlan % (n=1)
Patient was given the opportunity to explain the health problem	97% (32)	75% (3)	100% (1)
Patients privacy was ensured	97% (32)	100% (4)	100% (1)
Doctor explained the questioning and physical examinations and the health problem*	88% (21)	75% (3)	100% (1)
Doctor explained the intake of prescribed medicine**	85% (22)	75% (3)	100% (1)
Doctor asked if patient currently takes prescriptions	55% (18)	75% (3)	0% (0)
Patient was given chance to ask questions about the investigation, health problem and treatment	79% (26)	100% (4)	100% (1)
Doctor listened carefully to patients concerns and questions and gave satisfactory answers	76% (25)	100% (4)	100% (1)
Patient got advice on health problem	52% (17)	100% (4)	100% (1)
Medical doctor was polite during consultation	97% (32)	100% (4)	100% (1)

\* relevant only when examination was conducted; \*\* only relevant if medicine were prescribed

#### Table 25 Payment for health service - exit interviews

	MFMC % (n=33)	FMC - Stundenqan % (n=4)	FMC - Mohlan % (n=1)
Did you pay today for your health consultation?	24% (8)	0% (0)	100% (1)
Did you get a receipt for your payment?	100% (8)	Not applicable	100% (1)

## **Appendix B: Questionnaire**

Quality of Care Assessment - Infrastructure Assessment	Answers
Interviewer_ID	
IMEI (International Mobile Equipment Identity)	
Date of interview	
Start time of interview	
Name of municipality	
Name of facility	
Oral consent given by interviewee	yes no
Which services do you provide at this facility?	
Family planning	yes no
Antenatal care	yes no
Obstetric and newborn care	yes no
Immunization	yes no
Child preventative and curative care	yes no
Adolescent health	yes no
Sexually transmitted infections	yes no
Tuberculosis	yes no
Non-communicable diseases	yes no
Surgery	yes no
Do you provide any outreach activities?	yes no
If yes, SPECIFY	
Do you have laboratory services?	yes no

Do you have X-ray facilities?	yes
	no
How many days of the working week is at least one doctor present to provide general primary health care services?	1-2 days per week
	3-4 days per week
	5 or more days per week
Facility infrastructure and overall cleanliness and maintenance	
The facility and immediate surroundings (facility yard, waiting area	yes
outside) are free from long grass, paper debris and solid waste.	no
The facility has a rubbish bin which is properly used and not overflowing.	yes
The facility has a fubbisit bin which is property used and not overnowing.	no
There is a designated waiting room for patients.	yes
	no
The current waiting area is mopped, free of dust, trash; dirt, spider webs,	yes
and generally tidy.	no
There is at least one designated consulting room for women.	yes
	no
There is at least one designated consulting room for children.	yes
	no
All examination room(s) ensure(s) privacy/confidentiality (door, window	yes
blind, curtain).	no
All examination rooms are mopped, free of dust, trash; dirt, spider webs,	yes
and the rooms are generally tidy.	no
All examination rooms are well illuminated.	yes
	no
The facility has electricity	yes
	no
During the past 7 working days, did you have any power cuts of more	yes
than 1 hour during opening hours.	no
Is there routinely a time of year when this facility has a severe shortage	yes
or lack of power?	no
If yes, SPECIFY:	
The facility has a functional generator	yes
.,	no
If the health facility has a functional generator: is fuel available today for	yes
	yes no
If the health facility has a functional generator: is fuel available today for the generator? The facility has a functional heating system.	

	1
If yes, SPECIFY:	
Has the facility a functional communication equipment (functional landline telephone or cell phone) available (either private phone or facility phone)?	yes no
What type of phone do you have available?	private cell phone of staff
	cell phone of facility
	landline of facility
The facility has functional computer.	yes no
The facility has a functional printer.	yes no
The facility has internet access.	yes no
During the past 7 working days did you have internet for at least 1 hour every day?	yes no
The administration shelf is filed and in order.	yes no
Does the facility have a patient record system?	yes no
In which year was the patient record system introduced?	
Are there sufficient empty patient record cards available?	yes no
Are minimum hygiene and safety standards in the facility ensured?	
There is running water in the facility (out of the tap).	yes no
There is warm water available (out of the tap).	yes no
Is there routinely a time of year when this facility has a severe shortage or lack of water (out of the tap)?	yes no
If yes: In case there is a severe shortage or lack of water (out of the tap), where do you fetch water?	well (protected)
	bottled water
	water tank/storage
	other
If other, please SPECIFY:	

Functional washing points exist in examination rooms and/or entrance hall, and scap or hand disinfectants and water are available.       yes         Labelled containers for medical waste disposal are available in all required areas (e.g. examination rooms).       yes         The facility has adequate and safe disposal of sharps (sharps box/container).       yes         The facility has adequate and safe disposal of infectious waste.       yes         Infectious waste is temporary stored at a protected place.       yes         Sharps waste is temporary stored at a protected place.       yes         There is regular and appropriate collection for infectious waste.       yes         The facility has essential disinfectants and antiseptics.       yes         The facility has at least one accessible and functional toilet for patients.       yes         The facility has at least one accessible and functional toilet for starf.       yes         The toilet(s) or latrine is clean.       yes         A washing point is available near the toilet or latrine.       yes         Soap and water are available at the washing point near toilet or latrine.       yes         Soap and water are available displayed in public?       yes         no       Are the facility opening hours visibly displayed to the public?       yes		1

Good morning! My name is [NAME]. We are here on behalf of the Accessible Quality Healthcare Project funded by the Swiss Development Cooperation to conduct a survey of health facilities in our project area. The objective of this study is to assess the quality of health care services provided in health facilities. The Ministry of Health and the ethical review board has approved this study. We would like to interview people who have today consulted the medical doctor for their own health issues or for a child. Your experiences are very important to improve aspects related to quality of care. Information collected from this interview/questionnaire will be used by Accessible Quality Healthcare Project. Summaries of findings	

Have you been here today for issues related to your own health or the one of a child (child must be with the person)?	yes no
Socio-demographic information	
	female
Patients' gender	male
Year of birth	
Mother/father/caretaker older 18 with child (child is patient)	yes no
Satisfaction with health service	
	very unsatisfied
	unsatisfied
Overall: How satisfied were you with the services you received today?	satisfied
	very satisfied
Received services	
	did not access this HC in the past
Excluding today: How often did you over the past 3 month access this	3 months
HC?	1-3 times
	more than 3 times
	chronic condition
	antenatal care
What was the reason for your consultation today?	child health
	immunisation
	other
	conduct an examination
	write you a prescription
Did the medical doctor	Other
Aspects of todays consultation	
At the beginning of the consultation, were you given the opportunity to	ves
explain your health problem?	no
During your visit today, did the medical doctor ensure your privacy?	yes no
Did the medical doctor explain the questioning and physical examinations and your health problem?	yes no
Did the medical doctor clearly explain the intake of prescribed medicines	yes
to you?	no
Did the medical doctor ask if you are currently taking any (other)	yes
prescriptions?	no
· ·	
During consultation were you given a chance to ask questions about the	yes
· ·	
During consultation were you given a chance to ask questions about the investigations and your health problem and treatment?	yes no
During consultation were you given a chance to ask questions about the	yes
During consultation were you given a chance to ask questions about the investigations and your health problem and treatment? Did the medical doctor listen carefully to your concerns and questions and did he/she give satisfactory answers?	yes no yes
During consultation were you given a chance to ask questions about the investigations and your health problem and treatment? Did the medical doctor listen carefully to your concerns and questions and	yes no yes no
During consultation were you given a chance to ask questions about the investigations and your health problem and treatment? Did the medical doctor listen carefully to your concerns and questions and did he/she give satisfactory answers? During consultation, did you get any advice on your health problem?	yes no yes no yes no
During consultation were you given a chance to ask questions about the investigations and your health problem and treatment? Did the medical doctor listen carefully to your concerns and questions and did he/she give satisfactory answers?	yes no yes no yes
During consultation were you given a chance to ask questions about the investigations and your health problem and treatment? Did the medical doctor listen carefully to your concerns and questions and did he/she give satisfactory answers? During consultation, did you get any advice on your health problem?	yes no yes no yes no yes
During consultation were you given a chance to ask questions about the investigations and your health problem and treatment? Did the medical doctor listen carefully to your concerns and questions and did he/she give satisfactory answers? During consultation, did you get any advice on your health problem? Was the medical doctor polite in general during consultation? We would now also like to ask you a few questions on your knowledge and opinion on health. Are you willing to continue the interview with me for	yes no yes no yes no yes no yes

	I
	difficult or fast breathing
	fever
	chest in drawing
	chest pain especially when
In your opinion, what are symptoms that children with Acute Respiratory Infections (ARI) have?	breathing deeply blue lips and nail beds (cyanosis)
	seizures
	inability to swallow
	inability to drink or breastfeed vomiting after each drinking or
	breastfeeding

	Any other food?
PLEASE SPECIFY	
	strongly agree
	agree
How much do you agree with the following statement: Unsafe water, poor sanitation and hygiene can cause the diarrhea but not ARI	neither agree, nor disagree
sumation and hygione can cause the diarmed but hot AN	disagree
	strongly disagree
Non-communicable diseases	
	diabetes
	high blood pressure
	high blood pressure obesity
Which risk factors for cardiovascular disease do you know?	obesity
Which risk factors for cardiovascular disease do you know?	obesity smoking/tobacco use (Nos) high cholesterol/high blood fat
Which risk factors for cardiovascular disease do you know?	obesity smoking/tobacco use (Nos)

	age
	stress
	other
	don't know
	none
Which of the following is a typical symptom of a heart attack?	left-sided chest pain
	headache
	feeling thirsty
	pain in the legs
	don't know
	frequent need to urinate
	lower back pain
Which of the following is not a typical symptom caused by diabetes?	tiredness
	unexplained weight loss
	don't know
	strongly agree
	agree
How much do you agree with the following statement: Overweight people are healthier.	neither agree, nor disagree
	disagree
	strongly disagree
	strongly agree
	agree
How much do you agree with the following statement: Smoking does not	neither agree, nor disagree
effect the health.	disagree
	strongly disagree
	strongly agree
	agree
How much do you agree with the following statement: Changing my	neither agree, nor disagree
lifestyle today will not affect my health later.	disagree
	strongly disagree
	strongly agree
	agree
How much do you agree with the following statement: I cannot influence	neither agree, nor disagree
my health because it depends on the doctors.	disagree
	strongly disagree
	no, not at the moment
	I am trying from time to time
Are you currently taking measures to have a healthy lifestyle?	yes, sometimes
	yes frequently
	not motivated
	rather not motivated
How motivated are you to change your lifestlye?	rather motivated
	motivated
	do more physical exercise
	lose weight eat less fat
What have you already changed in your life to decrease your risk of	eat less sugar
getting cardiovascular disease? (do not read responses)	eat more fruits and vegetables
	stop smoking /stop using Nos
	control my diabetes more actively (if applicable)
	control my high blood pressure
	more actively (if applicable)

	I have never tried
Now a few last questions	
Basic information	
Did you pay today for your health consultation?	yes no
If no, why not?	benefitting from any economic or social aid scheme
	health insurance
	other
Please, SPECIFY	
Did you get a receipt for your payment?	yes no
Are you benefitting from any economic or social aid scheme?	yes no
This following questions concern the person who answered	
	never attended school
	completed lower primary school (max 5 years)
What school level did you complete?	completed primary school (9 years)
	completed high school (12 years)
	completed college/university
	other
PLEASE SPECIFY	
	farmer
	employed
	self-employed business
	housewife
What is your current occupation?	governmental employee, teacher, administrative / professional,
	unemployed
	pensioner
	Other
